Dear Parent/Carer

A student in Year 11 at our school has been diagnosed with a form of cancer that will require treatment that will significantly weaken their immune system, making them highly susceptible to infections. As school plays a vital role, we need your support to protect this student through this challenging time.

To help protect this student, we ask that you notify the school immediately if your child develops symptoms of chickenpox, measles, mumps, shingles, hand-foot-and-mouth disease, whooping cough, and any other contagious or flu-like illnesses. If another member of your household has symptoms of measles, chickenpox, or shingles, it is particularly important to inform the school as soon as possible. Additionally, we also urge you to strictly adhere to the 48-hour rule following any episode of sickness and diarrhoea before allowing your child to return to school. These measures are essential to prevent the spread of infections.

Please be assured that your child is not at any risk from this situation. However, the health and well-being of our student who is at risk depends on the cooperation of all parents, and we hope we can count on your support.

If you have any questions or concerns, please do not hesitate to speak with a member of our staff. Thank you for your understanding and cooperation in helping us protect the health and wellbeing of all our students.

Yours sincerely

Mr D Crossley
